T E L E C O P Y

TO: DENISE KEANE (212-907-5344

DATE: JUNE 24, 1994

Clausen Ely advises that he is not aware of any presently pending public comment period of the Office of Environmental Health Hazard Assessment (OEHHA) on any issue. Cal EPA has comment periods open until July 11, 1994, on two chapters of the Cal EPA risk assessment on ETS.

Ely indicates that the DART Committee asked that a scientific synopsis be prepared regarding the reproductive effects of exposure to ETS. To his knowledge, this document has not been made public. The DART Committee may not meet again until October 1994.

Please call if we can follow-up.
